

TEMPLE PROJECT

April 2017

In October 2007, the DCRS started providing dog and cat food for many of Samui's temples. In April 2008, the Temple Project-Team (Jay, Linda & Tom) started to not only give food but also vaccinate and provide medical attention to dogs and cats. If absolutely necessary, the injured or sick animal is brought to the shelter for further treatments. Our work includes a lot of street work and many small villages surrounding the temples.

Au - A helper we do not want to miss!

Au giving the daily medicine to the ones who need it...

Au is doing such an amazing job at the shelter and especially for the little souls in the puppy house he is so much more than 'only an employee' who comes in for the daily cleaning, feeding and handing out of the medication. He has become an absolute expert in seeing straight away when one of the dogs is not well and has no problem pointing this out to us immediately so that we can take the necessary action. Even though his hands are absolutely full and often the day does not have enough hours for all the work that he has to get done, for him-every soul counts.

Jay and Linda are very grateful to have such a trustworthy and hard working helper working in the PuppyHouse...Au is a man with a true animal-heart!

We were very happy to hear that Au will soon not only be taking care of dogs but also of a little Baby-Boy
CONGRATULATIONS
AND ALL THE VERY BEST FOR THE
NEW CHALLENGE!

We will totally understand if you sometimes show-up knackered in the morning

Our ,before / after dog'

Some time ago, a Thai animal friend informed us about Mr. Old-Man and asked us for help. Mr. Old-Man lives together with a lot of dogs, which are now his family.

Of course all of them were not yet vaccinated, dewormed or sterilized. Also, some dogs were sick or suffered from mange. Except for one dog - MARLA, we were able to treat all right at the location they live and meanwhile almost all of them are sterilized.

Marla was full of open wounds, some of them already infected and also mentally Marla seemed to be doing very badly. So we decided to take her to the shelter / puppy house for a few weeks of intensive care.

She was very shy and never really liked being at the shelter....

... so we were all very relieved to see that Marla responded well on the medicine and her skin quickly recovered. She had also opened up to us, but nevertheless we realized that we should bring her back to her family sooner than later

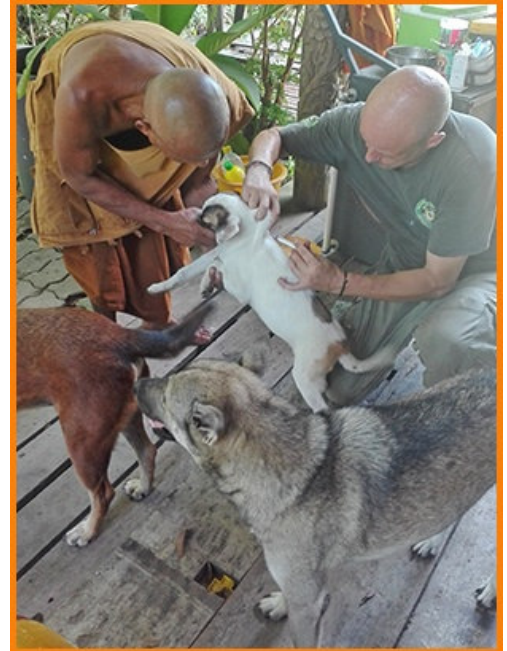

Mr. Old-Man and Marla were both very happy about the reunion.
We drive past them regularly and set the necessary injection to Marla. We also take care of the other dogs if necessary
And we bring Mr. Old-Man dog food.

Every single treatment is being recorded and here are some facts in average numbers from the last 3 months:

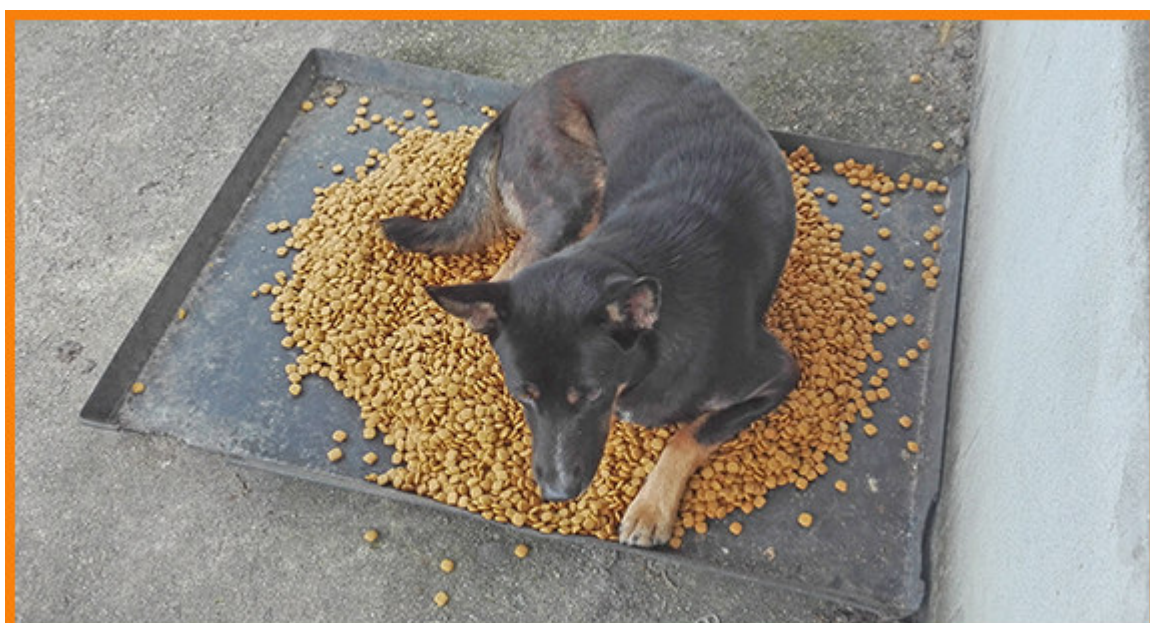

55 Vaccinations / month
65 Wound cleaning / month
115 Mange treatment / month
60 Animals taken in for neutering / last 3 months
35 Animals taken in for further medical treatment / 3 months

Every month we deliver over 1,000 kg! of dog and cat food to the temples and the villages -Food Stations included

Some pictures from the work at the Temples in the last 3 months
